zapier

contacts from new activity in ClickFunnels contacts

You've got better things to do than add your contacts to various accounts! With this integration, Zapier will automatically add or update your ActiveCampaign contacts when there is new contact activity in your ClickFunnels account. This ensures that contact information is consistent across your accounts, and that no duplicate contacts are created.

How this ClickFunnels-ActiveCampaign integration works

1. There is new activity for a contact in ClickFunnels
2. Zapier adds/updates the contact in ActiveCampaign

Apps involved

ClickFunnels
ActiveCampaign

Create this Zap
